Project

Food Munch   project1_link

Technologies used : HTML, CSS, Bootstrap

Discover the world of food with this responsive website that showcases a comprehensive list of food items.

- Designed with a user-centric approach, this website features HTML structure elements and Bootstrap components to ensure a seamless experience.
- Get a closer look at the food items with product videos, available at the click of a button.

Todos Application   project2_link

Technologies used : HTML, CSS, JS, Bootstrap

A task management solution, designed to make life easier.

- Streamlined task management through a combination of HTML, CSS, and Bootstrap for an intuitive interface.

- Seamless CRUD operations through JavaScript event listeners and dynamic UI updates.
- Secure task persistence with local storage methods, ensuring that your tasks are always available.

Wikipedia Search Application

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

Developed custom wikipedia search application where user can search and view curated results and can see detailed explanation in wikipedia by clicking on the specific result

- Displayed list of search results with HTML list elements with hyperlink as url, styled list using CSS, Bootstrap and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

foodapplication

Technologies used : HTML, CSS, JavaScript, Bootstrap, React.js, Node.js, mongodb
similar to zomato

Certificates

hackathon participation certificate
participated in hackathon conducted in our college during technical fest we veloped a career guidence application for 10th completed students th show them ailable career options and universities providing that course
